

Test Case ID	P003_TC_001	Test Case Description	Keyboard-only user can search for word “allowance” and open the wellness allowance page		
Created By	Adrian	Reviewed By	Adrian	Version	1.0

QA Tester's Log

Tester's Name	Anonymous	Date Tested	14/10/25	Test Case (Pass/Fail/Not Executed)	Pass
----------------------	-----------	--------------------	----------	---	------

S #	Prerequisites:
1	Access to a physical keyboard (no mouse)
2	Internet access and a desktop browser (Chrome, Edge or Safari)
3	The website https://www.du.se/en is reachable and fully loaded
4	Browser zoom level set to 100% (default)

S #	Test Data
1	Search term “allowance”
2	Alternate search term “wellness”
3	Expected target link text: Health and Wellness allowance
4	Device: Laptop or desktop computer
5	Input method: Keyboard (Tab, Shift + Tab, Enter)

Test Scenario

Keyboard access to find “wellness allowance”

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Open https://www.du.se/en	Page loads, keyboard focus lands on a logical starting point (e.g., body or skip link)	Page loads successfully	Pass
2	Use Tab/Shift to reach the site search field	Focus visibly reached the search input, no traps encountered	As Expected	Pass

3	Type allowance and submit (Enter)	Search results page loads with relevant results	Page loads	Pass
4	Use Tab to move through results and selects the Health and Wellness allowance result (Enter)	Target page opens without losing focus, no keyboard trap	Target page opens and is available	Pass

Priority: High (primary path for task completion)

Test Case ID	P003_TC_002	Test Case Description	Mobile user with limited precision can safely tap search and open the wellness allowance result		
Created By	Adrian	Reviewed By	Adrian	Version	1.0

QA Tester's Log

Tester's Name	Anonymous	Date Tested	14/10/25	Test Case (Pass/Fail/Not Executed)	Pass
----------------------	-----------	--------------------	----------	---	------

S #	Prerequisites:
1	Access to smartphone or tablet (iOS / Android)
2	Browser installed
3	Stable internet connection
4	Device screen rotation locked (portrait)
5	Accessibility zoom enabled

S #	Test Data
1	Search term: "allowance"
2	Alternate keyword: "exercise page"
3	Target link: Health and Wellness Allowance
4	Zoom levels tested: 100%, 125%, 150%
5	Input method: Finger touch (single tap only)

Test Scenario

Touch target size and spacing on mobile

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	Open https://www.du.se/en on phone	Page is responsive, no overlapping controls	Page is responsive in desktop browser and in mobile	Pass

2	Tap into search field (no fine motor gestures)	Tap target is easy to hit first try, keyboard opens	Easy to hit	Pass
3	Enter allowance and submit	Results appear; list items are clearly separated	As Expected	Pass
4	Tap the Health and Wellness Allowance result	Link activates reliably without miss-taps, page opens	As Expected	Pass

Priority: Medium–High

Test Case ID	P003_TC_003	Test Case Description	Task can be completed without drag/long-press gestures, accidental taps can be cancelled		
Created By	Adrian	Reviewed By	Adrian	Version	1.0

QA Tester's Log

Tester's Name	Anonymous	Date Tested	14/10/25	Test Case (Pass/Fail/Not Executed)	Pass
----------------------	-----------	--------------------	----------	---	------

S #	Prerequisites:
1	Device supporting both mouse and touch input
2	Browser supporting gesture input
3	Website https://www.du.se/en accessible and loaded
4	Pointer gestures enabled in system settings
5	User has basic knowledge of tap/click/drag interactions

S #	Test Data
1	Search term "allowance"
2	Alternative input: On-screen keyboard for typing
3	Gesture types tested: Tap, drag, long-press, swipe
4	Cancellation method: Move pointer off element before releasing
5	Device types: Laptop + touchscreen or smartphone

Test Scenario No complex gestures and pointer cancellation

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	From home page, open search and type allowance	No drag/slide required to reveal essential controls	As Expected	Pass

2	Submit search	Submission uses single tap/Enter, no long press-needed	As Expected	Pass
3	Open results, begin a tap on wrong link but cancel before release (move finger off, then lift)	Tap is cancelled; wrong link does not open	As Expected	Pass
4	Successfully open the correct Health and Wellness Allowance link	Only deliberate, completed tap/click triggers navigation	As Expected	Pass

Priority: Medium

Test Case ID	P003_TC_004	Test Case Description	Logical focus order and operable controls on the “Health and Wellness Allowance” page		
Created By	Adrian	Reviewed By	Adrian	Version	1.0

QA Tester's Log

Tester's Name	Anonymous	Date Tested	14/10/25	Test Case (Pass/Fail/Not Executed)	Pass
----------------------	-----------	--------------------	----------	---	------

S #	Prerequisites:
1	The Health and Wellness Allowance page opens successfully
2	Keyboard connected and functional
3	Browser zoom level at 100% or higher if needed
4	Visible focus indicator enabled (in OS/browser)
5	No interfacing extensions altering tab order

S #	Test Data
1	Page URL: https://www.du.se/en/medarbetarwebb/employee-information/health-and--wellness/health-and-wellness-allowance/
2	Input method: Keyboard (Tab, Shift + Tab, Enter, Space)
3	Observed headings: Health and Wellness Allowance, What the allowance covers
4	Expected focus sequence: Header -> Main -> Content -> Links -> Footer
5	Expected visible focus indicator colour: Blue or default outline

Test Scenario

Page reading and focus order on target page

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed / Suspended
1	From results, open the target page	Page loads at top, visible focus indicator present	As Expected	Pass

2	Use Tab/Shift+Tab to traverse headings/links/buttons	Focus follows meaningful sequence matching visual layout	As Expected	Pass
3	Activate any in-page controls with Enter/Space	Controls work with keyboard, no traps, state is conveyed	As Expected	Pass
4	Confirm that relevant info about the exercise app eligibility is reachable without precision action	Information is discoverable/readable via simple taps/keys	As Expected	Pass

Priority: High
